

## Quanta 5

Point-to-Point solution with  
advanced interference mitigation  
techniques

# About

## Infinet Wireless

The world's leading developer and manufacturer of Broadband Wireless Access solutions creating carrier-grade wireless backbones and access networks for service providers

More than **500,000** deployments in over **130** countries

**2,500** square meters of own production facilities

**100+** employees

**30** offices around the world, in strategically important countries

**100+** major distributors all over the world

Quanta 5

Quanta 6

Quanta 70

## Quanta family

**Quanta** is a new family of Point-to-Point wireless solutions with an impressive performance of up to **650 Mbps** in the **5 GHz**, **6 GHz** and **70 GHz** frequency ranges.

Outstanding technical features make Quanta family attractive for businesses of any size.

# Quanta family features

# Quanta 5

Quanta 5 is a brand new record-breaking spectral efficiency 5 GHz Point-to-Point solution with an impressive performance of up to 650 Mbps in 56 MHz channel size and up to 460 Mbps in 40 MHz band.

Quanta 5 offers a unique combination of high performance, affordability and ease of installation.

Radio subsystem

## Octopus SDR Platform

One of the latest Infinet's achievements.

Infinet's latest Octopus Software Defined Radio (SDR) platform has been designed using a state-of-the-art proprietary SDR technology specifically aimed at increasing link performance several-fold.

### Features:

- Software defined radio platform
- ARQ algorithm
- The highest packet performance

### Solves problems:

- Limited spectrum availability
- Growing interference
- Demands for yet more capacity

# Interference Mitigation Techniques

 Instant DFS

Quanta 5 devices continuously perform background spectrum monitoring and seamlessly change channel to the least noisy frequency without link interruption, taking into account the spectrum conditions at the location of both connected devices

 Hybrid-FDD

Different frequency channels could be used for data transmission in the uplink and downlink directions. It allows to reduce the impact of channel interference in high spectrum utilization conditions

 Automatic Repeat Request (ARQ)

Enables packet re-transmission in case of previous unsuccessful delivery. The algorithm increases the connection reliability and the end services quality

 Per-stream AMC

The modulation-code scheme is automatically selected separately for each data transmission direction. Interference received by one of the devices has a minimal impact on a whole communication channel

# Technical Specifications

Modulation	SC-FDE
Modulation coding schemes	14 MCS, from QPSK 1/4 to QAM256 7/8
Frequency range	4900–6000 MHz
Channel width	3.5, 5, 7, 10, 14, 15, 20, 28, 30, 40, 50, 56 MHz
Center frequency adjustment step	1 MHz
Transmit power	up to 27 dBm
Receiver sensitivity	up to -101 dBm
Duplex scheme	TDD, H-FDD
Antenna	Integrated dual polarization flat panel 18, 23, 25 and 28 dBi 2x type-N connectors for external dual polarization antenna
Maximal range	200+ km
Air frame	from 1 to 10 ms
Proprietary technologies	ARQ, Instant DFS

Radio subsystem

## Quanta 5 Advantages

- A wide set of channel widths allows to flexibly allocate the frequency at the radio network planning stage
- 14 modulation-code schemes allow to adapt to the radio deterioration by performance reduction with a small step
- Air frame range allows to control payload transmission and latency, especially for latency sensitive applications like PTZ cameras, IPTV, etc.

## Power subsystem

### Link budget

Quanta 5 devices have a link budget of up to 174 dB which allows to achieve reliable connectivity at a distance of 40 km in clear line-of-sight conditions, as well as provides sufficient margin for near- and non-LOS deployments at shorter distances.

Transmit power at the highest modulations is also one of the key performance metrics, allowing devices to achieve the highest performance over long distances and in noisy spectrum. Quanta 5 transmit power at QAM256 is up to 24 dBm.

Model	Antenna gain, dBi	Link budget, dB	Maximal range, km
 Q5-18	18	164	up to 20
 Q5-23	23	174	up to 40
 Q5-25	25	178	up to 60
 Q5-28	28	184	up to 70
 Q5-E	-	from 128	200+

Power subsystem

## Quanta 5 Advantages

- Available with a wide range of integrated antennas 18, 23, 25 and 28 dBi, as well as a connectorized version for using with 3rd party external antennas, Quanta 5 family is the ideal choice for a large array of applications
- A high sensitivity gives possibility to operate at maximum modulations with a lower transmit power. Due to this, interference is reduced allowing it to achieve much higher density of collocated wireless units

## Performance subsystem

# Performance

Quanta 5 packet performance does not depend on the packet size and provides a reliable real-time traffic transmission.

Packet performance

up to 1,200,000 pps

Throughput

up to 650 Mbps

Latency

up to 1.7\* ms

\* For the air frame 1 ms

Performance subsystem

## Quanta 5 Advantages

- Quanta 5 performance reaches 650 Mbps which meets the needs of most last mile links, as well as trunk channels of the light and medium networks
- Quanta 5 devices provide high-quality operation of various end-user services due to the high packet performance regardless of the traffic type

## Network Functionality

Support of up to 9,038 bytes on jumbo frames allows to reduce the service traffic and increase the useful data volume.

For optimal integration into existing networks, Quanta 5 supports VLAN. To provide high-quality services for trunk and last mile channels there are tools for smart traffic prioritization and shaping.

### Wired interfaces

Combo: 1xGE(RJ45), 1xSFP

### Jumbo frame

9,038 bytes

### QoS

8 priority queues

### Packet classification

IEEE 802.1 p

### Network protocols

VLAN support

Network subsystem

## Quanta 5 Advantages

- Quanta 5 devices support necessary network functionality for organizing end-user communication channels. It has the ability to isolate traffic at the datalink layer and prioritize various services traffic
- Quanta 5 could be integrated into existing optical networks thanks to second SFP port

## Security options

Thanks to a built-in rich security features, traffic security is under full control.

### Management

HTTPS, SSH, SNMP v3

### Radio security

Link ID, Access key

### Authentication

Password protection, RADIUS

### Syslog

Supported

### Access limitation

Network access whitelist

## Security

# Quanta 5 Advantages

- Wireless connection is secured using reliable features that reduce scenarios of link establishment with an attacker's device
- Secure web and command-line access via HTTPS and SSH protocols
- Centralized authentication, authorization and account management using the RADIUS protocol
- Access to the management interface limitation using an access whitelist option

# Operation

The wireless link reliability and performance depends on the installation and alignment quality. The adjustment can be performed using the MONT-KIT-85 mounting kit and the LED indication on the device case.

High-precision azimuth and elevation adjustment

Mounting kit with horizontal and vertical alignment

RSSI level, power, wired and wireless link indicator

The power status, wired and wireless link status, RSSI level LED indication on the device case

# Technical Specifications

Operating temperature range from -55 °C to +60 °C\*

Dust and water protection IP66  
IP67

Wind load 160 km/h – operational  
200 km/h – survival

Power supply IDU-CPE-G  
IDU-CPE-G(24W)  
IDU-BS-G (60W)  
IDU-LA-G(V.01)  
AUX-ODU-INJ-G

PoE 802.3at  
proprietary passive PoE

Power consumption up to 15 W

\* Models with “t” index in PN

Operation subsystem

## Quanta 5 Advantages

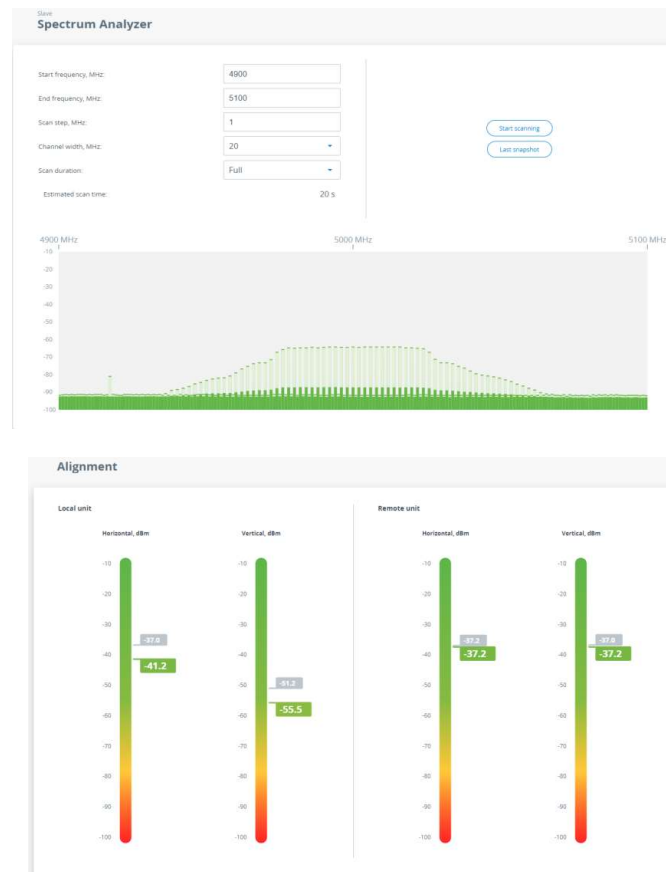

- Low power consumption compared to competitors extends battery life in case of an accident and reduces power supply costs. In addition, the low power consumption allows to use Quanta 5 devices in solar power supply schemes
- The wide temperature range and compliance with IP66 and IP67 allow to deploy reliable wireless links in adverse climatic conditions
- Built-in lightning protection increases reliability and durability of Quanta 5 devices

Operation subsystem

# Models Configuration

Models	Q5-18	Q5-23	Q5-25	Q5-28	Q5-E
Frequency range	4.9–6.0 GHz				
Antenna gain   Beamwidth	18 dBi 18 × 18 deg	23 dBi 10 × 10 deg	25 dBi 8 × 8 deg	28 dBi 5 × 5 deg	external
Size and weight	188 × 188 × 45 mm 1.3 kg	305 × 305 × 66 mm 1.75 kg	350 × 350 × 71.5 mm 2.3 kg	600 × 600 × 68 mm 5.8 kg	180 × 190 × 86 mm 1.2 kg
Wired interfaces	1xGE(RJ45)				

# Outdoor testing of Q5-23

The devices show stable performance at distances of up to 30 km in the 20 MHz band and up to 13 km in the 40 MHz band.

# Applications

Geographically distributed enterprises in LoS, nLoS, NLoS conditions

Building-to-building enterprise use

Redundancy links

Telecom operators trunk channels at a distance of several kilometers

## Comparison Quanta 5 with InfiLINK Evolution

Parameter		Quanta 5	InfiLINK Evolution
Frequency range, MHz		4900–6000	4900–6050 4900–6425
Channel width, MHz		3.5, 5, 7, 10, 14, 15, 20, 28, 30, 40, 50, 56	20, 40, 80
Transmit power, dBm		up to 27	up to 25
Interference Mitigation Techniques		Instant DFS Hybrid-FDD Per-stream AMC Extended set of MCS	Instant DFS
Throughput, Mbps	40 MHz	up to 460	up to 305
	Max value	up to 650	up to 650

### Quanta 5 Advantages

The advantages realized in Quanta 5 devices compared to the InfiLINK Evolution are directly related to the use of the Octopus SDR platform:

- extended set of modulation-code schemes
- extended set of channel width
- wide set of interference mitigation techniques

Success story

# Guanajuato University, Mexico

## Tasks

Trunk channel with a maximum range

Stable data transmission

## Solution

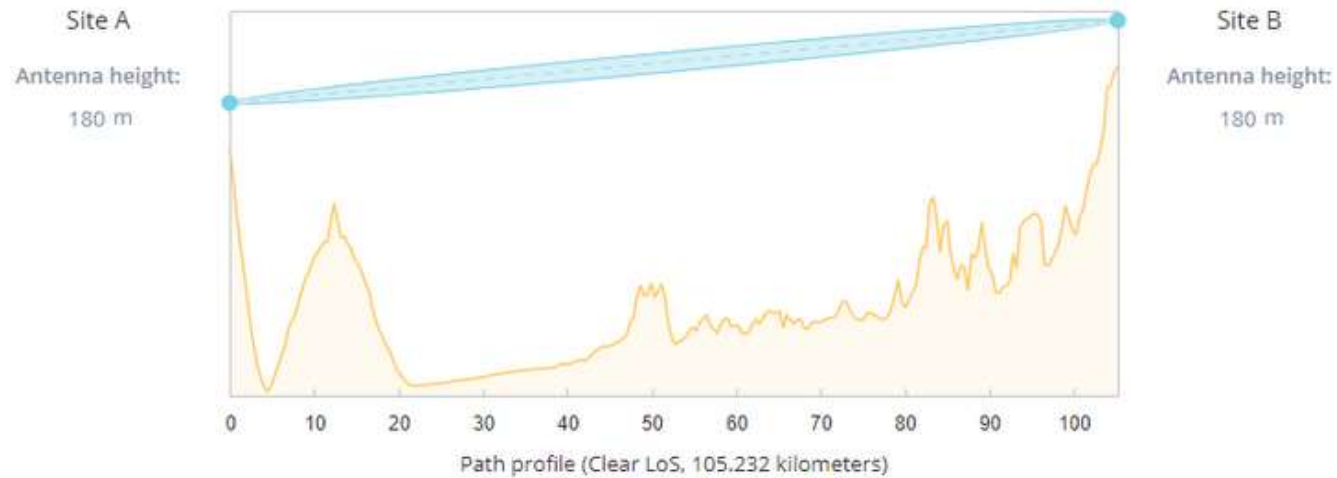

### Quanta 5

- Q5-E models
- External antenna with 35 dBi gain

## Advantages

A wireless link with a range of 105 km

Communication channel performance up to 400 Mbps

Success story

# Video surveillance in Celeste, France

## Tasks

Video surveillance for security assurance

High density

High interference

## Solution

**Quanta 5**

- Q5-23 models

## Advantages

40 video surveillance cameras with a video traffic prioritized

Reliable communication channels with the required performance in interference environment

# IW Ecosystem

Infinet Wireless develops services to make the process of interaction with the Quanta 5 family devices as simple and convenient as possible. These services are designed to support product operation at all stages.
